

Data Reporting Policy Statement

At Albany Portfolio Management we operate a strict policy to ensure that any data published on our website is at all times:

- Accurate
- Impartial
- Independently Verifiable

Unless otherwise stated, the data employed to demonstrate price movements or to generate graphs is collated from the software that supports our [Price-Checker](#) service. A full explanation on the functionality of this facility may be found in the FAQs on the [Price-Checker](#) page.

The underlying data source for Price-Checker is price-comparison website wine-searcher.com which publishes the offers of nearly 20,000 merchants, brokers and auction houses in real time. Much of the data on wine-searcher can be viewed for free; the remainder is available to subscribers of the Pro version which costs \$29.95 USD per year.

If you have any concerns about any of the data published on our website, or any comments as to how we might improve our reporting, we would be anxious to [hear from you](#).
